President's Message

Seasons' Greetings to all of you. It gives me immense pleasure to address all the members of IAC.

'CYTOCON 2014' is coming closer and going to be organized at Kota Rajasthan from 13 to 16 November 2014. Dr Naresh Rai, Organizing Secretary with his team is putting all efforts to make this event a grand success. A large number of national and international delegates are expected to participate and disseminate their knowledge in the field of cytology. The conference will have a large number of scientific sessions including guest lectures, oration, award lectures, free papers, posters sessions, work shops, CMEs and symposium on various topics. We all are eagerly waiting to enjoy this forthcoming academic feast and to meet our friends.

I request all of you for your full cooperation to the organizers and encourage your friends and colleagues to attend this event in full strength. Waiting to see you soon!

Dr. Shyama Jain
President Indian Academy of Cytologists
Head, Department of Pathology
Maulana Azad Medical College,
New Delhi

Secretary's Scribble

Dear Friends,

There has been a gush of activity since my last scribble as we had our last Annual Conference, and many State Chapter meets recently.

Secretary's Message (continued)

Cytology in the recent years has been progressing rapidly and maybe will soon outpace other specialities of Pathology especially with Ancillary techniques like immunocytochemistry, flow cytometry, special histochemistry and other tests now being part and parcel of the armamentarium of most of the cytology diagnostic centres. But at the same time, how can we do away with complementing cytology with histopathology, which all of us agree, is the gold standard of diagnosis.

At the last Annual Conference at Puducherry organised by Dr Verma, we had the occasion to interact with many cytologists from India and abroad. At the GBM there has been a revamp of the committees with some youngsters who have been inducted into the executive. However it was disheartening to note that for 5 vacancies of executive members we had nominations for only two and the other three were filled by recommendations from the executive committee. Do we have a dearth of cytologists who refrain from taking up responsibilities of the academy to carry it to greater heights ?

Our Academy has grown in numbers and every month about 10-15 new faces are joining it, indeed a very healthy sign. However as I always keep repeating we have to grow exponentially to become a formidable force of our speciality, so that the International Community will eagerly look forward to our participation in its activities. Though we have grown at the national level, no new efforts to form Regional/State Chapters are seen. Though many states have a sizable number of cytologists, for example Maharashtra and Tamil Nadu, no efforts are being made to channelize them into Regional State Chapters. The redeeming fact however is that the Chapters functioning are very active and vibrant, conducting regular annual meets. I do request them to report their activities in the Newsletter as well as to us, the parent Academy. Also an update of their Office bearers is required to be sent to the Academy.

SOPs have been formulated by Dr Dev Prasoon and its final draft form is being circulated to all members for their perusal and offer their suggestion/clarifications which will be finally be discussed at a special GBM for the same purpose at Kota before being passed to be incorporated into the rules and regulations of the Academy . The GBM of the previous meet at Pududcherry is being circulated for your reading and approval at Kota. Elections are also due for various posts for which the schedule is circulated. Announcements for IAC Fellowship training as well as for the various awards and call for topics for CME/Symposium and Workshop at the next Conference at Dehradun are also made. In spite of increasing the Fellowship honorarium to Rs 20,000 we have had only one applicant. I request our senior cytopathologists to encourage juniors to undergo this fellowship training.

This years Conference is at Kota, the educational hub on the banks of the Chambal river, which is being organised by Dr Naresh. Rich academic topics ranging from ancillary cytological techniques, intra operative cytology, breast cytology and thoracic cytology will be covered by diverse faculty. I do look forward to a large gathering to be present there. Adieu till we meet again in this forum.

Message from the Editor, Newsletter:

Friends, it's a great pleasure to bring out the March April newsletter of IAC. Once again the state chapters have been quite active and have sent pictures in profusion. While it is nice to see our colleagues, it does make the newsletter PDF attachment quite bulky. Despite that, please do keep them coming. I plan to put in smaller sized pictures in future issues. Being an e-newsletter, it would be easy to zoom in on the pictures. Au Revoir till then.
